Prof. Usha Ram, Dr. Archana K Roy and Dr. Harihar Sahoo

About IIPS: The International Institute for Population Sciences, which celebrated its Golden Jubilee in the year 2006, was established in Mumbai in July 1956 with joint collaboration of the United Nations Population Fund (UNFPA), the Government of India, and the Sir Dorabji Tata Trust to serve as the regional institute for training and research in population studies for the countries in Asia and the Pacific region. The Institute is a “Deemed University” functioning under the administrative control of the Ministry of Health and Family Welfare, Government of India. This is the only institute of its kind in the world exclusively devoted to teaching and research in population and health related issues. The IIPS alumnus are occupying prestigious positions in international and national organizations, universities, development agencies, and non-governmental organizations, and have created a brand value for the Institute. The Institute is running a number of research activities in collaboration with international and national research institutes/organizations and universities.

The Institute plays a pivotal role in planning and development of the country by generating valuable health and development indicators through nationwide large scale sample surveys at state and district level, and is a National Nodal Agency for conducting the prestigious surveys like NFHS (DHS-India), DLHS, LASI, SAGE, GATS, and Youth Study. Until 2019, the Institute has trained 4192 students (3514 from India and 678 from 41 different countries) through various courses.
